Questions

1. DoDAF

1.1. How do DoDAF and MoDAF relate?

DoDAF:

- is a product of the United States Department of Defense;
- defines Systems, Operational and Technical Standards Views;
- has an underlying data element model called the Core Architecture Data Model (CADM).

MoDAF:

- is a product of the United Kingdom Ministry of Defense;
- reuses many of the DoDAF Views but adds a few new ones;
- has an underlying data element model called the Enterprise Reference Model (ERM), that is different from the DoDAF CADM.

1.2. What version of the DoDAF CADM was used?

The CADM-AP233 mapping is based on CADM 1.02.

2. Documentation

2.1. How can I help write documentation?

This project uses [Apache Forrest](http://forrest.apache.org/) (<http://forrest.apache.org/>) to generate documentation from XML. Please download a copy of Forrest, which can be used to [validate](http://forrest.apache.org/docs/validation.html) (<http://forrest.apache.org/docs/validation.html>) , [develop](http://forrest.apache.org/docs/your-project.html#webapp) (<http://forrest.apache.org/docs/your-project.html#webapp>) and render a project site.
