

INDUSTRIAL SIGN & LABELLING SOLUTIONS

Identifying All Your Needs

No industry in the world nowadays is exempt from the need for professional signage and labelling. This need is more prominent now that at any other time due to strict HSE guidelines across all industries.

Requirements range from simple colour identification tags, health and safety signs, traffic signs and accessories through to complex machine face-plates or barcoded labels.

At Express Electrical we have a wide and varied in-house identification capability. This unique ability to supply product to all industries and provide a solution regardless of application or environment makes us a market leader in the production of standard or bespoke labels.

Health & Safety Signs

Safety signage is an essential part of business within commercial and industrial sectors. We stock a vast range of standard safety signs in a variety of materials including self adhesive vinyl, semi-rigid plastic, aluminium and photoluminescent.

Call us now and ask for our full colour catalogue and current price list which cover the following:

- **Fire Exit, Fire Action & Fire Equipment signs**
- **Prohibition, Mandatory, Hygiene & Hazard signs**
- **Multi Purpose, Prestige & Floor signage**
- **Photoluminescent signs to BS 5499 (part 4)**
- **Sign frames and fixings**
- **Factory notices, First Aid posters and office signs**
- **HazChem & Transport labels and tapes**
- **Barrier, security, reflective and floor marking tapes**
- **Class 2 (BS 873) traffic signs, stanchions, ramps, cones, posts and fixings**

Engraved Labelling

With 20 years experience in not only supply but also manufacture of engraved laminate materials our knowledge in suitability of materials for particular applications and environments is industry leading.

We offer a full range of material and single or multiple colour combination options to suit your specific requirements.

Modern manufacturing methods of laminates has led to the ability to offer customers not only text but also graphic and logo capabilities.

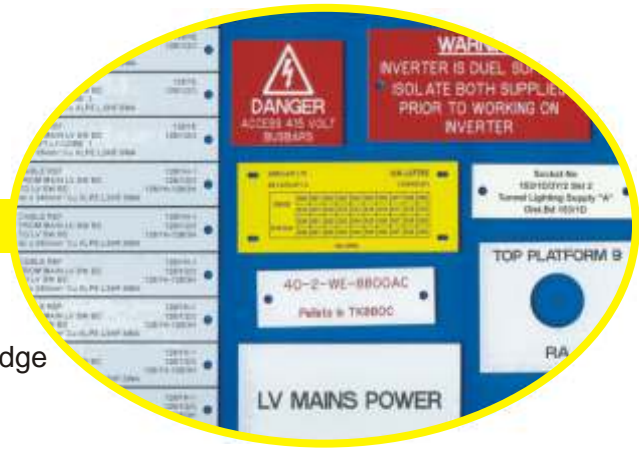

- External, rigid, semi-rigid and flexible laminates
- Single or multiple colour options on individual labels
- Standard and custom labels manufactured to your needs
- Laser engraved to ensure the highest quality of mark & detail
- Equipment labels, valve tags, faceplates, nameplates, rating plates & safety signs
- Supplied in "Easy-Pickability" customer defined kits
- Supplied with fixing holes / tape if required
- Free form shape capabilities

Anodized Aluminium

Metalphoto is the highest quality anodized aluminium and meets the stringent industrial and military standards. Graphics are imbedded in the anodic layer of the material and protected by its sapphire-hard surface that resists abrasion and chipping as well as most industrial solvents and chemicals. Metalphoto is perfect for severe environmental conditions where temperature extremes, rough handling or sunlight would destroy ordinary materials.

Metalphoto also answers your need for a quality appearance. Because Metalphoto is a photographic process, symbols and lettering reproduce with exceptional sharpness and clarity, from the smallest type to the most intricate design, in black, natural aluminium or your choice of colours.

- Tested for 20 years outdoor exposure
- Excellent abrasion and chemical resistance
- Metalphoto used on aircraft, Navy destroyers and the International Space Station
- Various material thickness options
- Black, natural aluminium and colour options

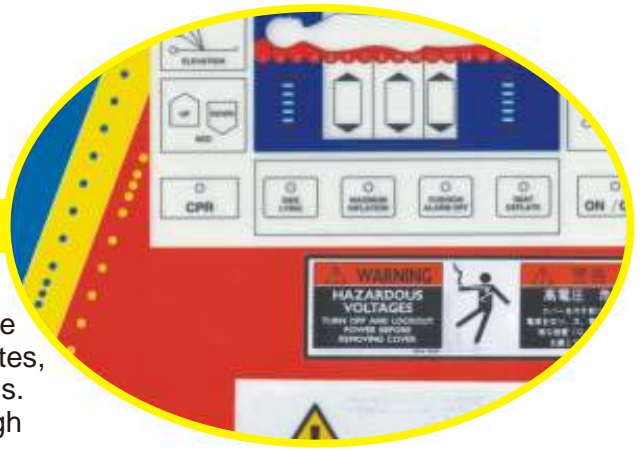

Vinyl Cutting & Printing

Our range of vinyl based materials are used within a wide range of applications including, face plates, machine plates, vehicle signage, window graphics and decorative designs. Our materials come in many forms such as standard, high temperature, semi-rigid, magnetic, glass effect, tamper evident, and are available in an abundance of colour options. Other features such as high performance permanent acrylic adhesives are available where applications dictate. We supply not only cut to size vinyls but also print in single spot or full colour to meet your requirements.

We can easily accommodate single, one-off proto-type labels for approval or larger production runs where necessary.

Features include:

- **Vinyls available for indoor or outdoor use**
- **Single spot or full colour printing capabilities**
- **Reverse cut for internal application window graphics**
- **Custom labels manufactured to your specific requirements**
- **Coloured, clear, magnetic, glass or frost effect, semi-rigid material options**
- **Supplied with high performance adhesives where required**
- **Reverse print materials for ultimate label performance**
- **Face, name, machine and rating plates**
- **Free form shape capabilities**
