

Rugby Baptist Church

“ECO TRANSPORT” DAY

10am to 3.30pm Saturday 6th October, 2012
John Lees Hall, Regent Place, Rugby

Supported by **Rugby**  **friends of the earth**
see things differently

The Eco Congregation Group at Rugby Baptist Church have been planning a day, supported by Rugby Friends of the Earth and others, when you can come along to find out lots of ways to respect God's creation by your travel choices. The emphasis will be on practical advice but there will be a spiritual dimension (and food) too.

Details are to be finalised, but building on our church environment information day in 2010 and Eco-Congregation Award last year, we anticipate a number of stalls, events and displays covering themes such as;

- Free cycle training 'taster' sessions for adults and children (provided by qualified trainers from WCC)
 - Cycle repair 'surgery' and security marking
 - Launch of cycle parking facilities for our church
 - Guided bike ride / treasure hunt
 - Information about
 - urban walking route planning
 - local public transport options
 - car sharing to get to church
 - air travel and its impact
 - Photographic display or competition on a "green transport" theme
 - "How would Jesus travel"...?
 - Locally produced food
 - and many more activities... the list is still growing
- there's lots more details to follow but **SAVE THIS DATE!! all are invited.**

If you can suggest any other ideas please do get in touch. For more details or further information on the event please email: eco-cong@rugbybaptist.org.uk or contact the Church office on 01788 570410.
